

Demolition of Old St. Joe's High School (1840 Mayfair)

Demolition work will begin in the coming weeks at the old St. Joe's High School. Mobilization and asbestos abatement have already been completed and the demolition process is now moving into its next phase. The demolition is expected to take approximately **12 weeks**.

Work will be conducted between **7:00 AM and 3:00 PM, Monday through Friday**, per village code as to start time. Occasional work on Saturdays is possible, depending on weather conditions and contractor progress.

During the demolition, the contractor will adhere to all OSHA requirements and the Cook County Environmental Control Ordinance to ensure the safety of both workers and the general public. **Water will be used extensively to prevent dust and dirt from becoming airborne.** Vibration monitoring equipment has been installed to alert the contractor and prevent construction-related vibrations approaching levels that could potentially damage adjacent structures.

Below is a diagram highlighting the construction fence, vibration monitoring and demolition areas around the old St. Joe's High School and Brothers House.

We continue to work with the Village and if there are any questions please contact the referenced information below.
